## **Merchant Warehouse Partners with Comstar Interactive to Offer the Blue Bamboo POS Terminal.**

Boston, MA and South Plainfield, NJ - June 26, 2007 – Merchant Warehouse is pleased to announce that it is among the first merchant account providers to offer the new “Blue Bamboo” H50 wireless terminal powered by Charge Anywhere® from Comstar Interactive. Merchant Warehouse has made a significant inventory investment in this exciting new wireless terminal and has it available for immediate sale to merchants, agents and ISOs through their website, [www.merchantwarehouse.com](http://www.merchantwarehouse.com).

The Blue Bamboo terminal is powered by PABP compliant Charge Anywhere® POS software and utilizes Comstar’s PCI Level 1 compliant ComsGate Payment Gateway. It is ideal for the mobile environment where the most important success factors are portability, ease of use, and cost. The Blue Bamboo also offers advanced security features with EMV 1 & 2 certification and has achieved PCI PED POS-B certifications for its advanced security and cryptographic based technology, representing the first wireless POS terminal in this category.

“We are thrilled to be one of the first to offer the new Blue Bamboo terminals powered by Charge Anywhere,” said Henry Helgeson, CO-CEO of Merchant Warehouse. “We think this will be an especially attractive piece of equipment within the agent community given its features and cost. Merchant Warehouse has always had a keen focus on technological advancements in the payment processing industry and the Charge Anywhere software and the H50 hardware represents a step forward in the expanding wireless credit card processing space.”

“By seizing the opportunity to take inventory and distribute the Blue Bamboo terminal powered by Charge Anywhere, Merchant Warehouse will reap the rewards of leading the market in distributing the newest low-cost, feature rich, terminal in wireless payments today,” notes Paul Sabella, President and CEO of Comstar Interactive. “Comstar offers the PABP compliant software and PCI compliant gateway services that the card associations require and our partners’ desire. Merchant Warehouse’s eagerness to market the H50 powered by Charge Anywhere is confirmation that this new low cost wireless solution will be a perfect fit for ISOs, banks, and processors looking for robust but easy to use wireless solutions.”
