

**PRESS RELEASE**

**CHARGE Anywhere® Designed for QuickBooks Announces Compatibility with QuickBooks® Version 2008**

*Industry leading point of sale and electronic payment software solution streamlines transaction processing and adds enhanced data security features to QuickBooks 2008 version.*

**March 25, 2008 – South Plainfield, NJ ---** CHARGE Anywhere ([www.chargeanywhere.com](http://www.chargeanywhere.com)), a leading provider of secure mobile payment software solutions and electronic payment services, recently announced the release of its CHARGE Anywhere® Secure Payment Software plug-in solution for QuickBooks® version 2008, financial software application. CHARGE Anywhere provides businesses using the Pro, Premier and Enterprise editions of QuickBooks 2008 with enhanced functionality, industry leading data protection and encryption technology. CHARGE Anywhere's wide range of solutions include enabling secure and efficient credit card transaction processing through wireless, IP, Wi-Fi and Mobile Point of Sale (MPOS) terminals.

The CHARGE Anywhere solution designed for QuickBooks allows ISOs and Agents to retain ownership of merchants that utilize QuickBooks, while continuing to provide credit card processing services. Merchants are also enabled with the capability to accept and securely process credit card transactions directly from their QuickBooks application using any processor that is certified with ComsGate™ - CHARGE Anywhere's Payment Card Industry (PCI DSS) Level 1 compliant, IP & Wireless Payment Gateway.

Specifically designed as an end-to-end Point of Sale (POS) and electronic payment solution platform for Effectively managing card data security with industry best practices, CHARGE Anywhere features an encrypted database and advanced key rotation functionality that securely stores and protects sensitive transactional data. When integrating the CHARGE Anywhere secure payment solution with QuickBooks, merchants can quickly process and import credit card transactions generated via ecommerce, POS terminals and other wireless devices, and automatically apply the transaction details to the customer's payment screen. Users can also create recurring payment schedules, process multiple invoices and filter the data details either by invoice or account number, account name or ID, or by a particular date range.

**CHARGE Anywhere Secure Mobile Payment Software solution for QuickBooks 2008 also offers:**

- Compatibility with all major bank accounts, credit card processors and wireless carriers
- Enhanced data security, password protection and encryption technology – PCI Level 1, TAP, PCI PABP
- Industry specific data configurations and customized solutions for optimal business data management
- Flexible and scalable solution platform for single user and enterprise applications
- Compatibility with 2005 and later versions of QuickBooks Pro, Premier and Enterprise
