

PRESS RELEASE

CHARGE Anywhere Releases Compatible Software Application for QuickBooks Point of Sale
Industry leading point of sale software and electronic payment solution provider develops credit card processing software application for QuickBooks – Point of Sale edition.

South Plainfield, NJ – April 15, 2008 --- CHARGE Anywhere (www.chargeanywhere.com), a leading provider of secure mobile payment software solutions and electronic payment services, recently announced the release of its CHARGE Anywhere® Secure Payment Software solution for Inuit's QuickBooks® Point of Sale (POS) software application. CHARGE Anywhere provides enhanced functionality and industry leading data protection and encryption technology for the QuickBooks POS software application. The wide range of CHARGE Anywhere solutions empowers merchants with the capability to securely and efficiently process credit card transactions through wireless IP, Wi-Fi and Mobile Point of Sale (MPOS) terminals.

CHARGE Anywhere, designed for QuickBooks POS allows ISOs and Agents to retain ownership of merchant accounts that utilize QuickBooks, while continuing to provide credit card processing services. Merchants are also provided with the flexibility to process their credit card transactions through any major payment processor that is certified with ComsGate™ - CHARGE Anywhere's Payment Card Industry (PCI DSS) Level 1 compliant, IP & Wireless Payment Gateway.

Specifically designed as an end-to-end Point of Sale (POS) and electronic payment solution platform that effectively manages customer card data security with industry best practices, CHARGE Anywhere features an encrypted database and advanced key rotation functionality that securely stores and protects sensitive transactional data. When integrating the CHARGE Anywhere secure payment solution with QuickBooks, merchants can quickly process and import credit card transactions generated via e-commerce, POS terminals and other wireless devices. CHARGE Anywhere for QuickBooks POS also offers encrypted database management controls for securely storing sensitive customer account data. Merchants can also capture and manage pertinent customer contact information at the point of sale which can be used to support communications efforts and sales initiatives.

CHARGE Anywhere Secure Payment Software solution for QuickBooks POS also offers:

- Compatibility with all major bank accounts, credit card processors and wireless carriers
- Enhanced data security, password protection and encryption technology – PCI Level 1, TAP, PCI PABP
- Industry specific data configurations and customizable solutions for optimal business data management
- Flexible and scalable solution platform for single user and enterprise applications
