

CHARGE Anywhere® Helps Merchants Achieve Compliance Ahead of October 1, 2008 PCI Security Standards Council Regulations Deadline

SOUTH PLAINFIELD, NJ (September 29, 2008) – CHARGE Anywhere®, a leading provider of secure Point-of-Sale (POS) solutions and electronic payment services, is helping Level 3 and Level 4 merchants remain compliant in the dawn of the PCI Security Standards Council Regulation deadline of October 1, 2008. CHARGE Anywhere works hard to ensure that all of its payment solutions are PCI compliant. Backed with a PCI DSS Level 1 certified payment gateway, CHARGE Anywhere assists merchants to the highest degree possible by implementing PCI PABP compliant applications on the most valuable, affordable, and functional payment devices in the market. The range of solutions includes secure wireless POS terminals (Spectra, VeriFone, ExaDigm, NURIT, and HyperCom), payment software for Windows®, payment software designed for use with QuickBooks®, mobile point of sale software on Smartphones, and e-commerce solutions.

By using CHARGE Anywhere as their preferred secure POS Software and payment gateway, merchants can focus on their core business rather than dedicating their time to becoming PCI security experts. With PCI PABP secure applications, CHARGE Anywhere helps reduce the burden on merchants looking for compliant solutions. When partnering with CHARGE Anywhere, merchants will have an easier time becoming compliant by leveraging CHARGE Anywhere's years of experience and know-how in card payments security.

"The payment industry is now in a revolutionary period as security considerations driven by regulation and recent breaches begin to take the front stage. The responsibility is now on even the smallest merchants to comply with PCI DSS or PA DSS regulations. Why pay for a PCI self assessment questionnaire pointing out your vulnerabilities when you can buy a PCI compliant solution," said Paul Sabella, President and CEO of CHARGE Anywhere.

With the impending PCI Security Council Payment Application Mandate deadline, converting to CHARGE Anywhere's secure validated payment application, CHARGE Anywhere v2.0.0, takes only a few minutes out of a busy merchant's schedule and jump starts them on the path to PCI compliance for the current and future phases of the mandate. Once with CHARGE Anywhere, merchants will remain compliant by receiving secure downloads of all software updates. CHARGE Anywhere is beneficial to the merchant for maintaining PCI compliance and also for functionality and affordability of secure payment solutions.

About CHARGE Anywhere: CHARGE Anywhere is a leading provider of secure Point of Sale (POS) solutions and electronic payment services.
