

CHARGE Anywhere® Enables PIN Debit Card Payment Software for Microsoft Windows®

SOUTH PLAINFIELD, NJ (October 17, 2008) – CHARGE Anywhere®, a leading provider of secure Point-of-Sale (POS) solutions and electronic payment services, is delighted to announce the ability to accept PIN Debit payments with their Card Payment software for Windows®, compatible with QuickBooks Point of Sale. This is extremely beneficial to the Small and Medium Merchant Business community by allowing them to process PIN Debit transactions without changing their current software.

CHARGE Anywhere for Windows with PIN Debit capability not only expands the merchant's level of service, but reduces the transaction fee. With the increased fraud protection, PIN Debit is a smart decision for small and medium sized merchants that can assist in reducing chargebacks due to less fraudulent purchases. When you combine these functions into the merchant's QuickBooks software you are going to have a happier and more productive merchant.

CHARGE Anywhere with PIN Debit feature is available with the use of a PIN pad that will be attached to the computer via cable. The compatible PIN pad devices are the LinkPoint BankPoint II, VeriFone 1000 SE, and the Ingenico 3010. All of the mentioned PIN pads are PCI PED compliant and certified. In addition, the CHARGE Anywhere Point of Sale software has been validated and meets PCI PABP compliance standards and the ComsGate® Payment Gateway is certified PCI DSS Level 1 compliant.

With the addition of PIN Debit, CHARGE Anywhere has significantly improved the functionality of their CHARGE Anywhere Point of Sale software for retailers. With PIN Debit devices added, the CHARGE Anywhere for Windows software is now, more than ever, one of the most versatile, secure point of sale software terminals on the market. PIN Debit adds to a long list of features that include customizable software settings, gift, loyalty, versatility, and security.
