

CHARGE Anywhere® Achieves PA DSS (PCI PABP) Certification on Multiple Payment Software Applications

SOUTH PLAINFIELD, NJ (February 19, 2009) – CHARGE Anywhere®, a leading provider of secure Point-of-Sale (POS) solutions and electronic payment services is proud to announce that four of its software applications have been reviewed and certified to be compliant with PA DSS standards for card payment security.

This certification expands CHARGE Anywhere's portfolio of secure payment solutions which already includes secure payment gateway services and secure mobile payment applications on a wide variety of hardware platforms, including terminals, smartphones, and mobile computers. Now, that portfolio has been enriched with a payment software application on Spectra wireless POS terminals, payment application designed for use with QuickBooks®, mobile payment application for BlackBerry® Smartphones, and payment software for the VeriFone V^x wireless POS terminal line. These new certifications add to an already rich portfolio of certified applications that include a payment application for Windows Mobile Smartphones and the RIM 950. This brings the total number of CHARGE Anywhere fully compliant solutions to six.

The CHARGE Anywhere payment applications are beneficial to all in several ways. Merchants are able to capture critical business data along with all transactions. The secure application has custom fields that record data and transmit it securely along with the payment to ComsGate®, CHARGE Anywhere's secure payment gateway. Another benefit is the similarity of controls on all of the payment applications. This will allow service providers to simplify support across multiple platforms.

Agile, versatile, and secure CHARGE Anywhere's software solutions include a variety of value added features. PIN debit functionality allows one to lower rates and provides the choice for accepting debit cards. Available magnetic stripe readers reduce rates further by enabling swiped rates. The convenience of electronic signature capture, storage, and retrieval is at one's fingertips with CHARGE Anywhere's premier, hosted signature capture solution. ACH payments, receipt printing, management reports, and many other essentials are also available.

The CHARGE Anywhere team always strives to provide best of breed functionality while making no compromises on security. The new PA DSS certifications are the latest testament to that fact. CHARGE Anywhere's customers can rest assured that with CHARGE Anywhere they receive the latest cutting edge solutions that excel in usability and security.
