

CHARGE Anywhere[®] Named as Finalist in CTIA E-Tech Awards

Winners to be Announced at International CTIA 2010[®]

South Plainfield, NJ (March 17, 2010) - CHARGE Anywhere[®], for Android™ has been named a finalist in the Mobile Applications - Mobile Payments Category in the CTIA Emerging Technology (E-Tech) Awards. CTIA's fifth annual E-Tech Awards program recognizes products in 15 categories in the areas of mobile consumer electronics, luxury mobile, applications, enterprise, green solutions and network technology. International CTIA WIRELESS 2010[®] will take place March 23-25 at the Las Vegas Convention Center.

More than 80 prominent media and industry analysts judged the 300-plus entries submitted for the E-Tech Awards program this year. Products and services were judged on innovation, functionality, technological importance, implementation and the overall "wow" factor.

E-Tech Awards winners will be announced at a ceremony hosted by Robert Mesirov, vice president and show director for CTIA and Tim Bajarin, president of Creative Strategies, on Wednesday, March 24 at 2:00 p.m. on the Exhibits Innovation Stage located in the Emerging Technology Zone on the International CTIA WIRELESS exhibit floor, North Hall.

CTIA is offering companies two additional opportunities to win an award. Web visitors may vote for the Best Online Pick at www.ctiashow.com/awards. International CTIA WIRELESS show attendees will also have the chance to vote via text message onsite for products in the E-Tech Awards display to win Best in Show.

CHARGE Anywhere for Android enables merchants to quickly, easily and securely accept card payments at the point-of-sale or point-of-service-anytime, anywhere. The unique solution, available through select certified distributors, consists of in-house developed software for Android smart phones, a Bluetooth[®] card reader and receipt printer and proprietary payment gateway services. CHARGE Anywhere has created a comprehensive, end-to-end platform capable of offering

complete PCI security and unsurpassed mobile payment capabilities on any wireless network. Through CHARGE Anywhere's PCI DSS Level 1 payment gateway, the solution works with any major US payment processor and merchant account provider.

Using optional hardware such as a Bluetooth printer with integrated card reader, the CHARGE Anywhere solution helps merchants receive the lowest possible credit card processing rate and the best customer experience. Sales receipts can also be printed at the point-of-sale. The smartphone's touch screen interface enables electronic signature capture, eliminating the requirement for merchants to retain paper copies of signed receipts.

CHARGE Anywhere's solutions are also winners of the 2009 Best of Interop-PCI Security Solution, and the 2009 Electronic Transaction Association Technology Innovation Award.
