

Charge Anywhere Adds TSYS Certification to QuickSale EMV Product Offering

January 16, 2018 South Plainfield, NJ – Charge Anywhere, LLC, an experienced provider of EMV payment software and services, recently completed its second EMV certification with TSYS Acquiring Solutions. This EMV certification covers Charge Anywhere’s QuickSale Payment Applications for Android and Apple phones and tablets with the BBPOS Chipper Bluetooth and Audio Jack EMV Chip Card Readers on the TSYS Sierra platform.

This affordable, mobile EMV Chip and Signature solution expands Charge Anywhere’s already impressive lineup of EMV solutions for retail and mobile merchants. Previous EMV certifications have been completed with First Data, Chase Paymentech, TSYS and other processors utilizing the Miura Systems line of Bluetooth EMV PIN Pads.

“Charge Anywhere’s mission is to make Mobile Point of Sale (MPOS) easy,” commented Paul Sabella, CEO of Charge Anywhere. “The Chipper certification with TSYS is a great addition to our line of reliable, cost-effective EMV MPOS solutions. With our brand-able platform of software, payment gateway and remote key injections/software updates, Banks, ISOs and processors have all the tools they need to easily deploy MPOS and manage their portfolio.”

As with all of its EMV certified solutions, Charge Anywhere incorporates point-to-point encryption technology with the Chipper to further secure the transaction. Merchants can also utilize QuickSale to implement features like recurring payments, email marketing campaigns, QuickBooks integration and service fees. Developers can leverage Charge Anywhere’s EZ EMV SDK to integrate EMV payment functionality with the Chipper into existing mobile POS systems.

[Charge Anywhere](#) is a financial technology solutions company that makes EMV payments simple by enabling the last mile in the payment processing ecosystem. The Company is a leader in mobile payments with an award-winning MPOS/POS platform, technology and services that deliver payment flexibility and security backed by deep expertise in global implementations. Processors, integrators, developers and enterprises leverage Charge Anywhere’s white-label applications to enable MPOS that meet P2PE and payment card security standards worldwide. For banks, businesses and payment processors with legacy systems that need to adapt to new requirements or desire the next generation of payment applications, Charge Anywhere’s technology can enhance their payments capabilities.
