Charge Anywhere certifies for US EMV payments with Chase Paymentech

January 5, 2016 (South Plainfield, NJ) - Charge Anywhere®, LLC a leading provider of award-winning, secure payment applications and payment gateway solutions, recently announced the Class B U.S. EMV certification of its ComsGate® Payment Gateway with Chase Paymentech. This EMV certification enables Charge Anywhere to switch EMV transactions for U. S. merchants and acquirers using the Chase Paymentch Tandem processing platform.

Charge Anywhere has certified with Chase a series of encrypted pos hardware devices designed to accept EMV chip, chip and PIN, PIN debit and card card payments integrated to the Charge Anywhere software platform. The Miura Shuttle product line of EMV pos terminals, which includes the M006, M007 and M010 models, can be used with Android and Apple smart phones or tablets and with Windows computers. This EMV chip card payment solution is comprised of PCI compliant software and hardware and can be implemented as a stand-alone solution or quickly integrated into third party applications. A free [software development kit](#) is available to integrators.

This Chase Paymentech EMV certification underscores Charge Anywhere's focus and investment in delivering cost-effective, reliable EMV software and PCI compliant solutions to the US market. "We have successfully deployed tens of thousands Miura terminals with our EMV software in projects outside of the US. Our EMV solution supports retail and mobile implementations for merchants and we have a tool kit for software integrators to quickly and easily provide EMV payment functionality with minimal development effort and at a fraction of the cost of developing EMV card acceptance capabilities. Integrators using our semi-integrated tools can implement an EMV card acceptance solution in a few hours and get completely out of the scope of PCI DSS and PA DSS compliance," said Paul Sabella, Charge Anywhere's Chief Executive Officer.

This certification to the Chase Paymentech Tandem platform makes the Charge Anywhere EMV products immediately available to all Chase Paymentech merchants and acquirers in the US. Merchants, integrators, and acquirers who are in need of EMV solutions should contact Charge Anywhere.
