

Charge Anywhere Releases EMV Chip Card Payment Application for Windows

March 2, 2016 (South Plainfield, New Jersey) - Charge Anywhere® LLC, a leading provider of award-winning, secure payment applications and payment gateway solutions, now supports EMV chip card payments with its QuickSale® for Windows® Payment Application. *QuickSale for Windows* is a PCI Payment Application Data Security Standard (PA DSS) validated electronic payment application for businesses and ISVs looking for a plug and play, PCI validated, card brand certified software and hardware solution for chip card implementations in the United States.

With Microsoft Windows based PC (version 7.0 or higher), QuickSale for Windows is the perfect solution for retailers and can be deployed as a standalone application or in conjunction with any Point of Sale or Accounting software. QuickSale for Windows supports all standard electronic payments and includes a secure customer database for repeat customers, Spanish language support, the ability to print or email receipts and multiple user permission levels. This Charge Anywhere software can also be implemented in combination with Charge Anywhere's other payment software for Android and Apple devices and with its payment application designed for use with QuickBooks®.

Charge Anywhere has integrated and certified the Miura Systems hardware line of EMV POS devices and configured the terminals to process EMV/chip, EMV/chip and PIN, PIN debit, credit and gift card payments through the QuickSale for Windows Application. Developers and systems integrators can download our free EMV [software development kit](#) and enable EMV/chip card payments in a few hours. "Charge Anywhere continues to lead the way in providing cost effective EMV chip card payment solutions that merchants can deploy today. Following the release of Charge Anywhere's EMV software for Android and Apple iOS, our QuickSale for Windows application combined with a Miura EMV terminal provides SME merchants a complete retail solution with the functionality and security they demand at a price point they can afford," said Paul Sabella, Charge Anywhere's Chief Executive Officer.
